PROFESSIONAL SUMMARY

Senior Software Engineer with 4 years of experience architecting and deploying robust, highly scalable enterprise solutions using **Java 17+**, **Spring Boot** and **Microservices**. Proven expertise in engineering high-performance data pipelines with **Kafka**, **NiFi** and **AWS S3**, and automating complex business processes utilizing **Drools Rule Engine**. Adept at managing **Docker** containerized **Kubernetes** deployments and solving complex technical challenges within cross-functional teams. Committed to continuous learning, code reliability and taking end-to-end ownership of core enterprise projects that deliver measurable business impact.

TECHNICAL SKILLS

Languages & Data	Java (8/11/17/21), Python, C/C++, SQL, JavaScript, TypeScript, HTML5, CSS3, JSON, XML, YAML, AVRO
Frameworks & AI	Spring Boot (2.x.x/3.x.x), Spring Framework, Hibernate, FastAPI, Angular, Bootstrap, RAG, MCP, OpenAI API, LiteLLM, Drools DMN Rule Engine, REST, GraphQL, OpenAPI
Databases & Caching	PostgreSQL, pgvector, MySQL, MongoDB, StarRocks, Redis, AWS S3
Messaging & Pipelines	Apache Kafka, RabbitMQ, Apache NiFi
DevOps & Security	Docker, Kubernetes, ArgoCD, Jenkins, GitHub Actions, AWS, HAProxy, Keycloak, JWT, OAuth 2.0, CORS, HashiCorp Vault, GitHub Secrets
Testing & Quality	JUnit, Mockito, PowerMockito, Cucumber, JMeter, SonarQube, Postman
Observability & Tools	Grafana, Prometheus, Loki, Promtail, Consul, Git, GitHub, Maven, Javadoc, IntelliJ IDEA, VS Code, Eclipse, PyCharm, DBeaver, pgAdmin, Draw.io, Claude Code

PROFESSIONAL EXPERIENCE

SS&C Technologies	Jan 2022–Present Navi Mumbai, MH
Senior Software Engineer	Apr 2026–Present
▶ Scaled critical brokerage workflows for enterprise traffic, as measured by sustained module reliability, by owning end-to-end microservices, optimizing relational schemas for high-volume transactions, and using Claude Code to speed up development and refactoring. ▶ Reduced regression defects across the team, as measured by stable, predictable releases, by establishing BDD and unit testing standards and standardizing CI/CD with containerized deployments across environments. ▶ Accelerated Agile sprint deliveries and enforced clean code standards, as measured by on-time sprint completion, by mentoring junior engineers and leading cross-functional integrations with UI/UX and QA teams.	
Software Engineer	Jan 2022–Mar 2026
▶ Automated complex business logic and handled growing transaction volumes, as measured by uninterrupted production processing, by developing scalable microservices with thread-safe multithreading and concurrency utilities. ▶ Decreased production defects and streamlined release cycles, as measured by fewer escaped bugs and faster deployments, by executing unit, integration, and BDD testing and adopting containerized CI/CD builds. ▶ Ensured high availability for mission-critical modules, as measured by bottlenecks resolved before release, by conducting extensive load testing.	
Data Analyst Intern, Business Toys	May 2021 Bengaluru, KA
▶ Facilitated improved marketing decisions, as measured by actionable e-commerce insights, by analyzing consumer behavior data and building data visualizations to map trends.	
Android Developer Trainee, MindScript	May–Jun 2018 Thane, MH
▶ Delivered functional Android apps, as measured by a custom Music Player and a Student Management System built in a one-month sprint, by using Java for core logic and XML for responsive UI.	

KEY PROJECTS

Alts Digitization Service (VLM & LLM RAG System).

SS&C Technologies - 2026

Automated ingestion and parsing of complex, high-volume financial documents by engineering an event-driven microservices platform using **Python, FastAPI, and Kafka**. Improved unstructured-to-structured extraction accuracy and token efficiency by integrating **Vision-Language Models (VLM)** for layout-aware parsing and **LLMs with Retrieval-Augmented Generation (RAG)**, backed by **PostgreSQL, pgvector**, and **StarRocks** for metadata, similarity search, and OLAP analytics.

Altserve WireHouse Ingestion (ASWI) & Alternatives Connect (ALTS-C).

SS&C Technologies - 2022 & 2024

Automated high-volume document digitization and downstream **Mainframe** processing by engineering a batch-mode backend using **Java 17+, Spring Boot, and Drools Rule Engine**, with an **Angular** dashboard to streamline AWD configuration updates. Enabled secure B2B data exchange and deterministic routing to the core ASWI engine by architecting the client-facing **ALTS-C REST API** layer with strict **OpenAPI** contracts.

Jobs Internships and Courses Recommendation System.

B.E. final year – 2021-22 [\[PDF\]](#)

Delivered continuously improving opportunity recommendations by developing a **Python-based machine learning** system utilizing Content-Based, Collaborative, and Hybrid filtering, alongside **NLP/NLTK** for textual analysis and a continuous feedback loop.

Gesture Control Voice Command over Android Device.

Diploma final year – 2018-19 [\[Link\]](#)

Enabled accessible voice communication for mute individuals by engineering an **ATMEGA328 Microcontroller-based** hardware solution that detects hand gestures and transmits data via **Bluetooth** to an Android device for real-time voice command conversion.

ACHIEVEMENTS & RECOGNITION

First Runner-Up - SS&C Technologies GIDS Hackathon 2024

 Jul 2024

Secured 2nd position by developing a scalable, template-driven Document Digitization solution using **Vidado** that required only a one-time configuration, enhancing efficiency and enterprise scalability.

RESEARCH PUBLICATIONS

A Comparative Study on Gesture Control Voice Command Over Android Device.

EDUCATION

Don Bosco Institute of Technology, Mumbai

2019–2022

B.E. in Information Technology, University of Mumbai

CGPA: 8.50

Government Polytechnic Mumbai

2016–2019

Diploma in Computer Engineering, Autonomous Institute

88.71%

Samata Vidya Mandir, Sakinaka

2016

S.S.C., Maharashtra State Board

91.60%
