PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience in building robust and scalable solutions with **Microservices architecture**. Experienced in designing and implementing modular systems that enhance business value and performance. Strong analytical, leadership and communication skills with effectively solving complex challenges in cross-functional teams. Passionate about continuous learning and driving innovations in enterprise applications. Committed to ownership of projects that deliver measurable impact.

TECHNICAL SKILLS

Languages & Data	Java (8/11/17/21), C/C++, Python, SQL, HTML5, CSS3, JavaScript, TypeScript, JSON, YAML, LaTeX
Frameworks	Spring Boot (2.x.x/3.x.x), Hibernate, Angular (10/15/16/17)
Databases	MySQL, PostgreSQL , MongoDB
Messaging & Cloud	Apache Kafka , Apache NiFi, Data JPA, AWS S3
Rule Engine & Testing	Drools Rule Engine , JUnit 4/5, Mockito, PowerMockito, Cucumber, JMeter
VCS, DevOps	Git, GitHub (Actions), Docker, Kubernetes, Jenkins
Tools & Dependency	IntelliJ IDEA, Eclipse, VS Code, STS, Postman, pgAdmin, DBeaver, Maven

PROFESSIONAL EXPERIENCE

SS&C Technologies

Jan 2022–Present | Navi Mumbai, MH

Senior Software Engineer

Apr 2026–Present

- ▶ Led architectural design of enterprise-grade microservices using **Java 17+**, **Spring Boot 3.x.x**, and **Drools**, driving scalability and resilience decisions across critical brokerage workflows.
- ▶ Drove data pipeline architecture leveraging **Apache NiFi and Kafka**, overseeing real-time synchronization, data integrity, and **AWS S3** document management across distributed systems.
- ▶ Established team-wide testing standards with **JUnit, Mockito, and Cucumber**, maintaining 90%+ code coverage and standardizing **Docker/Kubernetes** CI/CD deployment practices.
- ▶ Mentored Software Engineers on Java fundamentals and clean code practices, leading cross-functional **Agile** ceremonies and guiding **Angular** front-end integrations with UI/UX teams.

Software Engineer

Jan 2022–Mar 2026

- ▶ Developed and deployed scalable microservices using **Java 17+**, **Spring Boot 3.x.x**, and **Hibernate**, managing 10K+ daily transactions and automating business logic via **Drools Rule Engine**.
- ▶ Designed **PostgreSQL/MySQL** schemas and optimized SQL queries; built high-performance **NiFi/Kafka** data pipelines and implemented **multithreading** utilities for thread-safe resource management.
- ▶ Maintained 90%+ code coverage across 1500+ test cases using **JUnit, Mockito, and Cucumber**; streamlined deployments via **Docker, Kubernetes, and Maven** within Agile sprint cycles.

Data Analyst Intern, Business Toys

May 2021 | Bengaluru, KA

- ▶ Analyzed E-commerce website metrics to identify consumer behavior patterns and support data-driven decision-making processes.
- ▶ Leveraged data visualization techniques to enhance marketing strategies and predictive analytics insights.
- ▶ Gained foundational expertise in translating raw consumer data into actionable business intelligence and improved audience targeting.

- Built functional mobile applications, including a **Music Player** and a **Student Management System**, during an intensive development program.
- Developed user interfaces using **XML** and implemented core backend application logic utilizing **Java**.
- Mastered the Android app lifecycle and debugging techniques while deploying projects on physical hardware for real-world testing.

KEY PROJECTS

Jobs Internships and Courses Recommendation System. B.E. final year – 2021-22  [\[PDF\]](#)

Developed a Python-based recommendation system using machine learning algorithms (Content-Based and Collaborative Filtering) to suggest relevant job, internship, and course opportunities. Leveraged NLP with NLTK for accurate text analysis, while collaborative filtering incorporated user feedback to improve recommendations.

Gesture Control Voice Command over Android Device. Diploma final year – 2018-19  [\[Link\]](#)

Designed a system to assist mute people by detecting hand gestures through flex sensors connected to a microcontroller. The captured gestures were processed into commands, transmitted via Bluetooth to an Android device, and converted into voice output for effective communication.

ACHIEVEMENTS & RECOGNITION

First Runner-Up - SS&C Technologies GIDS Hackathon 2024  Jul 2024

Secured 2nd position among 40+ teams by developing innovative Document Digitization solution using Vidado (ICR) technology. Implemented template-driven architecture with Spring Boot microservices and Angular frontend, featuring one-time configuration setup for enhanced efficiency and enterprise scalability.

RESEARCH PUBLICATIONS

A Comparative Study on Gesture Control Voice Command Over Android Device.

International Journal of Modern Engineering Research (IJMER), March 2019.  [\[PDF\]](#)

Jobs Internships and Courses Recommendation System.

Dickensian Journal, Vol. 22, Issue 6, June 2022.  [\[Link\]](#)

EDUCATION

Don Bosco Institute of Technology, Mumbai	2019–2022
<i>B.E. in Information Technology, University of Mumbai</i>	CGPA: 8.50
Government Polytechnic Mumbai	2016–2019
<i>Diploma in Computer Engineering, Autonomous Institute</i>	88.71%
Samata Vidya Mandir, Sakinaka	2016
<i>S.S.C., Maharashtra State Board</i>	91.60%

DECLARATION

I hereby declare that the information provided above is true to the best of my knowledge and belief.

Place: Thane, MH
