PROFESSIONAL SUMMARY

Senior Software Engineer with 4 years of experience architecting and deploying robust, highly scalable enterprise solutions using **Java 17+, Spring Boot and Microservices**. Demonstrated expertise in engineering high-performance data pipelines with **Kafka, NiFi and AWS S3**, and automating complex business processes utilizing **Drools Rule Engine**. Adept at managing **Docker** containerized **Kubernetes** deployments and solving complex technical challenges within cross-functional teams. Focused on optimizing code reliability and taking end-to-end ownership of core enterprise projects that deliver 25% higher system throughput and 50% fewer regression defects.

TECHNICAL SKILLS

Languages & Data	**Java** (8/11/17/21), **Python**, C/C++, **SQL**, JavaScript, TypeScript, HTML5, CSS3, JSON, XML, YAML, AVRO
Frameworks & AI	**Spring Boot** (2.x.x/3.x.x), Spring Framework, Hibernate, **FastAPI**, Angular, Bootstrap, **RAG**, **MCP**, Drools DMN Rule Engine, REST, GraphQL, OpenAPI
Databases & Caching	**PostgreSQL**, **pgvector**, MySQL, MongoDB, **Redis**, AWS S3
Messaging & Pipelines	Apache **Kafka**, RabbitMQ, Apache NiFi
DevOps & Security	**Docker**, **Kubernetes**, ArgoCD, Jenkins, GitHub Actions, AWS, Keycloak, JWT, OAuth 2.0, CORS, HashiCorp Vault, GitHub Secrets
Testing & Quality	JUnit, Mockito, Cucumber, JMeter, SonarQube, Postman
Observability & Tools	Grafana, Git, GitHub, **Maven**, Javadoc, IntelliJ IDEA, VS Code, Eclipse, PyCharm, DBeaver, pgAdmin, Draw.io, **Claude Code**

PROFESSIONAL EXPERIENCE

SS&C Technologies Jan 2022–Present | *Navi Mumbai, MH*

Senior Software Engineer *Apr 2026–Present*

- Build critical brokerage workflows for enterprise traffic, increasing module reliability by 25%, by owning scalable **microservices**, optimizing relational schemas for high-volume transactions, and using **Claude Code** to speed up development and refactoring by 20%.
- Reduced regression defects across the team by 50%, reflected in stable, predictable releases, by establishing **BDD and unit testing** standards and standardizing **CI/CD** with containerized deployments across 4 environments.
- Accelerated Agile sprint deliveries by 1 week and enforced clean code standards, demonstrated through on-time sprint completion, by **mentoring junior engineers** and leading cross-functional integrations with UI/UX and QA teams.

Software Engineer *Jan 2022–Mar 2026*

- Automated complex business logic and handled 25% higher transaction volumes, evidenced by uninterrupted production processing, by developing **microservices** with thread-safe **multithreading** and concurrency utilities.
- Decreased production defects by 50% and streamlined release cycles, reflected in fewer escaped bugs and 40% faster deployments, by executing **unit, integration, and BDD testing** and adopting containerized **CI/CD** builds.
- Safeguarded 99.9% high availability for mission-critical modules, demonstrated through bottlenecks resolved before release, by conducting extensive **load testing**.

Data Analyst Intern, Business Toys May 2021 | *Bengaluru, KA*

- Drove 15% improved marketing decisions, evidenced by actionable **e-commerce insights**, by analyzing consumer behavior data and building 10+ **data visualizations** to map trends.

Android Developer Trainee, MindScript May–Jun 2018 | *Thane, MH*

- Built 2 functional Android apps, as measured by a custom **Music Player** and a **Student Management System** completed in a one-month sprint, by using **Java** for core logic and **XML** for responsive UI.

KEY PROJECTS

Alts Digitization Service (VLM & LLM RAG System). SS&C Technologies - 2026

Automated ingestion and parsing of complex, high-volume financial documents by engineering a message-queue-based microservices platform using **Python, FastAPI, and Kafka**, increasing system throughput by 25%. Improved raw-to-formatted extraction accuracy by 50% and token efficiency by integrating **Vision-Language Models (VLM)** for layout-aware parsing and **LLMs with Retrieval-Augmented Generation (RAG)**, backed by **PostgreSQL**, **pgvector**, and **StarRocks** for metadata, similarity search, and OLAP analytics.

Altserve WireHouse Ingestion (ASWI) & Alternatives Connect (ALTS-C). SS&C Technologies - 2022 - 2024

Automated high-volume document digitization and downstream **Mainframe** processing by engineering a batch-mode backend with **Java 17+, Spring Boot, and Drools Rule Engine**, accelerating sprint delivery timelines by 1 week. Enabled secure B2B data exchange and deterministic routing to the core ASWI engine by architecting the client-facing ALTS-C **REST API** layer with strict **OpenAPI** contracts, reducing integration errors by 50%.

Jobs Internships and Courses Recommendation System. B.E. final year – 2021-22 🔗 [Link]

Delivered continuously improving opportunity recommendations by developing a **Python-based machine learning** system utilizing **Content-Based, User-Item-Interaction, and Hybrid** filtering, increasing recommendation accuracy by 25% through a continuous feedback loop.

Gesture Control Voice Command over Android Device. Diploma final year – 2018-19 🔗 [PDF]

Empowered mute individuals with accessible voice communication by engineering an **ATMEGA328 Microcontroller-based** hardware solution that detects hand gestures and transmits data via **Bluetooth** to an Android device for real-time **voice command conversion**.

ACHIEVEMENTS & RECOGNITION

First Runner-Up - SS&C Technologies GIDS Hackathon 2024 🏆 Jul 2024

Secured 2nd position competing against 40+ teams by developing a scalable, template-driven Document Digitization solution using **Vidado** that required only a one-time configuration, enhancing efficiency and enterprise scalability.

EDUCATION

Don Bosco Institute of Technology, Mumbai 2019–2022
B.E. in Information Technology, University of Mumbai CGPA: 8.50

Government Polytechnic Mumbai 2016–2019
Diploma in Computer Engineering, Autonomous Institute 88.71%

Samata Vidya Mandir, Sakinaka 2016
S.S.C., Maharashtra State Board 91.60%

DECLARATION

The information provided above is true to the best of my knowledge and belief.
