PROFESSIONAL SUMMARY

Senior Software Engineer with 4 years of experience architecting and deploying robust, highly scalable enterprise solutions using **Java 17+**, **Spring Boot** and **Microservices**. Proven expertise in engineering high-performance data pipelines with **Kafka**, **NiFi** and **AWS S3**, and automating complex business processes utilizing **Drools Rule Engine**. Adept at managing **Docker** containerized **Kubernetes** deployments and solving complex technical challenges within cross-functional teams. Committed to continuous learning, code reliability and taking end-to-end ownership of core enterprise projects that deliver measurable business impact.

TECHNICAL SKILLS

Languages & Data	Java (8/11/17/21), Python, C/C++, SQL, HTML5, CSS3, JavaScript, TypeScript, JSON, XML, YAML, AVRO
Frameworks & AI	Spring Boot (2.x.x/3.x.x), Spring Framework, Hibernate, Data JPA, FastAPI, Angular (10/15/16/17), Bootstrap, RAG, MCP, OpenAI API, LiteLLM, Drools DMN Rule Engine, OpenAPI, REST, GraphQL
Databases & Caching	MySQL, PostgreSQL, MongoDB, pgvector, StarRocks, Redis, AWS S3
Messaging & Pipelines	Apache Kafka, RabbitMQ, Apache NiFi, AVRO
DevOps & Security	Git, GitHub (Actions), Docker, Kubernetes, ArgoCD, Jenkins, AWS, HAProxy, Keycloak, JWT, OAuth 2.0, CORS, HashiCorp Vault, GitHub Secrets
Testing & Quality	JUnit 4/5, Mockito, PowerMockito, Cucumber, Postman, JMeter, SonarQube
Observability & Tools	Grafana, Prometheus, Promtail, Loki, Consul, Maven, Javadoc, IntelliJ IDEA, Eclipse, VS Code, STS, PyCharm, Draw.io, DBeaver, pgAdmin
AI Coding Tools	Claude Code, GitHub Copilot

PROFESSIONAL EXPERIENCE

SS&C Technologies

Jan 2022–Present | Navi Mumbai, MH

Senior Software Engineer

Apr 2026–Present

- Scaled critical brokerage workflows to support enterprise-level traffic by architecting and owning end-to-end **microservices** utilizing **Java 17+**, **Spring Boot 3.x.x**, and **Drools Rule Engine**.
- Achieved real-time data synchronization with zero data loss and dynamic document management by engineering a robust data pipeline and storage architecture utilizing **Apache NiFi**, **Kafka**, and **AWS S3**.
- Improved database query performance for high-volume transaction modules by architecting and optimizing **PostgreSQL** and **MySQL** relational schemas.
- Reduced regression defects across the team by establishing rigorous testing standards using **JUnit**, **Mockito**, and **Cucumber**, while standardizing **CI/CD** deployment practices via **Docker** and **Kubernetes**.
- Accelerated Agile sprint deliveries and enforced clean code standards by **mentoring junior engineers** and guiding **Angular** front-end integrations with UI/UX and QA teams.
- Boosted development velocity and test coverage, as measured by faster feature delivery, by leveraging **AI coding agents** (**Claude Code**, **GitHub Copilot**) for code generation, refactoring, and unit-test scaffolding under rigorous code review.

Software Engineer

Jan 2022–Mar 2026

- Automated complex business logic and managed high-volume daily transactions by developing and deploying scalable **microservices** using **Java 17+**, **Spring Boot 3.x.x**, **Hibernate**, and **Drools**.
- Ensured seamless real-time synchronization across distributed systems and efficient document retrieval by engineering **NiFi/Kafka** pipelines to process JSON/YAML streams and implementing **AWS S3**-based storage.
- Improved application responsiveness and thread-safe resource management by implementing advanced **multithreading** and concurrency utilities.

- Decreased production defects and streamlined deployment cycles by executing unit, integration, and BDD testing (**JUnit, Mockito, PowerMockito, Cucumber**) and leveraging **Docker, Kubernetes, and Maven**, while ensuring high availability for mission-critical modules through **JMeter** load testing.

Data Analyst Intern, Business Toys

May 2021 | Bengaluru, KA

- Facilitated improved decision-making for marketing strategies by analyzing online consumer behavior data to extract actionable **e-commerce website insights**.
- Supported the optimization of promotional offers and predictive analytics by developing comprehensive **data visualizations** to map consumer trends.

Android Developer Trainee, MindScript

May–Jun 2018 | Thane, MH

- Successfully developed functional Android applications, including a custom **Music Player** and a **Student Management System**, over a one-month intensive development sprint.
- Delivered responsive mobile user interfaces and robust backend application logic by utilizing **XML** for UI design and **Java** for core functionality.

KEY PROJECTS

Alts Digitization Service (VLM & LLM RAG System). SS&C Technologies

[Enterprise AI Project]

- Automated the ingestion and parsing of complex, high-volume financial documents by engineering a scalable, event-driven microservices platform using **Python, FastAPI, and Kafka**.
- Automated unstructured-to-structured data extraction, optimizing token usage and improving accuracy, by integrating **Vision-Language Models (VLM)** for layout-aware parsing and **LLMs with Retrieval-Augmented Generation (RAG)**.
- Ensured efficient storage and fast RAG retrieval by implementing a multi-model data layer with **PostgreSQL** for metadata, **pgvector** for similarity search, and **StarRocks** for OLAP analytics.

Altserve WireHouse Ingestion (ASWI). Core Backend System – SS&C Technologies

[Enterprise Architecture Project]

- Automated high-volume document digitization and downstream **Mainframe** processing by engineering a scalable batch-mode application utilizing **Java 17+, Spring Boot, and Drools Rule Engine**.
- Streamlined internal AWD configuration updates and operational workflows by developing a dedicated front-end management dashboard utilizing **Angular**.

Alternatives Connect (ALTS-C). Client-Facing API Gateway – SS&C Technologies

[Enterprise Architecture Project]

- Facilitated secure, high-throughput B2B data exchanges by architecting a client-facing **RESTful API** layer utilizing **Spring Boot**.
- Enabled seamless third-party integrations and deterministic request routing to the core ASWI engine by establishing strict **OpenAPI** contracts.

Jobs Internships and Courses Recommendation System.

B.E. final year – 2021-22 [\[PDF\]](#)

Delivered highly accurate and continuously improving opportunity recommendations by developing a **Python-based machine learning** system utilizing Content-Based, Collaborative, and Hybrid filtering algorithms, alongside **NLP/NLTK** for textual data analysis and a continuous feedback loop.

Gesture Control Voice Command over Android Device.

Diploma final year – 2018-19 [\[Link\]](#)

Enabled accessible voice communication for mute individuals by engineering an **ATMEGA328 Microcontroller-based** hardware solution that detects physical hand gestures and transmits the data via **Bluetooth** to an Android device for real-time voice command conversion.

Automatic Street Light Control.

Mini-project – B.E. SEM VIII

Ensured precise, automated ON/OFF energy management for street lighting systems by developing a **Wi-Fi-enabled circuit** with a **light sensor** that retrieves and responds to real-time geographical sunrise and sunset data.

Finder (Price Comparison Website).

Mini-project – B.E. SEM V

Facilitated cross-platform product price comparisons for e-commerce users by developing a full-stack responsive web application utilizing an **HTML, CSS, and Bootstrap** frontend paired with a **PHP and MySQL** backend.

Expedited emergency response by developing an **Android** application utilizing **accelerometer sensors, Firebase real-time databases, and Geolocation APIs** to dispatch SMS alerts containing plain-text addresses and Google Maps links upon shaking the device.

ACHIEVEMENTS & RECOGNITION

First Runner-Up - SS&C Technologies GIDS Hackathon 2024

 Jul 2024

Secured 2nd position by developing a scalable, template-driven Document Digitization solution using **Vidado** that required only a one-time configuration, enhancing efficiency and enterprise scalability.
